7. Daily Mail Insertion

Automate Your Document Processing

Neopost’s Output Management Software will get the best out of each and every of your documents.

Features & Benefits

Adapt Your Modular System To Your Needs

The modular design, from 1 to 11 feeders, of the DS-200 gives you peace of mind when purchasing a system to ensure your future needs and job requests are fulfilled.

Automate Your Total Mail Flow

A full range of output solutions allows you to easily adapt your mail processing to any postal rule and to optimize your mail process expenses. This includes:

• Flexible sorting unit to manage up to 3 outputs

• Intelligent franking machine connection

• High capacity trays or conveyors

Why Choose Neopost?

Neopost is a global leader in mailing solutions, shipping services and digital communications. We believe that people are the key to business success. That’s why our products and services are tailored to help your organization improve the quality of its interactions and bring people closer together. In this age of multichannel communications, we guide and empower you to interact in new and innovative ways. We advise you on how to create cost-cutting synergies. And we deliver global coverage with a strong local presence, offering you continued support by phone, onsite or online.

Today, Neopost is present in 31 countries and has a network of partners in more than 90 countries. We promote responsible business and sustainable development through our products and outreach programs. And our 6,200 employees worldwide are committed to making your interactions more responsive and more powerful – offering you a competitive edge that will open up a wealth of business opportunities.

Envelope conveyor Yes (optional)

Envelope feeder capacity up to 1,000

Documents feeder capacity up to 1,000

Fold types letter, zigzag, single, double parallel, no fold, 4...
The New Standard in Mail Production

The highly productive mail operating system that inserts an unprecedented variety of mail

There’s no doubt about it: the ability to guarantee your mail production is essential for your business.

The inserter is one of the most important elements in your mail flow. It needs to be easy to operate, highly productive and flexible. Neopost’s DS-200 has set new standards in all these aspects.

1. Cascade feeding for continuous run 2. Loading on the fly prevents stoppage 3. Flexible in a wide variety of inserts 4. Inserting up to 6mm thick booklets 5. Feeder Swap

Continuous operation is achieved by cascade feeding. If one feeder runs empty, another one takes over, giving a total capacity of 2,000 sheets.

6. Auto Divertion

To avoid stoppage and maximize productivity, the divert bin receives oversized sets or special documents, while the system keeps running.

2. Loading on the fly prevents stoppage

Even changing from one job to a completely different one takes only a few minutes. The system adapts itself to all the settings programmed in the memory for the job you select. But there is more to ease of use. And the DS-200 provides it every step of the way throughout your mail processing. From efficient paper and feeder loading to on screen error location.

The DS-200 guarantees optimum accessibility and sophisticated ergonomics. It provides quick, safe and easy access to the paper path throughout the entire system, so you’ll soon be back in business if there’s a break in production. Handling and processing your mail has never been so easy.

Highly Productive for The Widest Variety Of Mail

In addition to its amazing ease of use as a production inserter, the DS-200 also provides high speed performance. It can process up to 4,800 envelopes per hour. Because the DS-200 can process Landscape C4 envelopes, inserting up to 50 pages per envelope is now easier and more reliable. Plus, the high loading capacity of the DS-200 is a perfect match for its high speed. The system design reduces downtime, enabling you to work on other tasks at the same time – maximizing your productivity.

Every part on the DS-200 is designed to perform for you. From the high-capacity feeders and feeder swap to the automatic sheet diverter and the high capacity envelope output conveyor, the DS-200 delivers the high speed and perfect predictability you need.

High-capacity feeders, fast accumulation, and on-the-fly envelope loading – all designed to save you time.

On-screen services provide even better system uptime.

• High-capacity feeders, fast accumulation, and on-the-fly envelope loading – all designed to save you time.
• Online services provide even better system uptime.
• On-the-fly document loading from simple letters to 6mm thick glossy booklets.
• Mechanical adjustments are automatically carried out after a new job from the unlimited envelope and document library has been selected.

Insert Up To 50 Pages or 6mm Booklets

With its high-capacity sheet feeders combined with premium processing speed for multiple documents, the DS-200 is the perfect solution for the widest scope of mail applications. It can process coated and glossy booklets or CDs into all regular envelopes ranging from C5/E to C4. Plus, it can feed documents both portrait or landscape. Add this to the fact that the DS-200 is able to memorise an unlimited number of jobs to reduce set-up time and you can begin to imagine the unprecedented possibilities of the DS-200.

The DS-200 has been designed to run different jobs every day at the touch of a screen. Thanks to its intuitive handling, processing a large range of important mail batches or multiple and divergent documents, has never been so easy.
