

IM-2112

Mail Opener

Product Overview

- Self-adjusting feeder handles mixed size and thickness mail at speeds up to 400 per minute
- Proven milling cutter technology protects envelope contents from being sliced or damaged
- Processed envelopes have a soft, feathered-edge opening, eliminating paper cuts
- Two cut-depth settings for normal and thicker mail plus a no-cut setting for piece counting
- Opens up to 3,500 envelopes before the chip tray must be emptied
- Adjustable output tray easily accommodates flats and large envelopes

Additional Features

Milling removes chips as small as 0.01" from the envelope, producing a soft, feathered edge

Easy to view counter display

Maximum thickness: 4.8 mm

Also handles overnight envelopes

Large capacity chip tray
